

Advanced NRC/DOT Radioactive Waste Shipper 2-Day Review Seminar

January 23 - 24, 2017

Salt Lake City, Utah

Course Description

This course is designed to provide a comprehensive review of the U.S. Department of Transportation's (DOT) and Nuclear Regulatory Commission's (NRC) regulations governing the safe transportation

and disposal of radioactive materials. Designed as a thorough refresher, this course offers the student the latest on changes in technology and regulations. Emphasis is placed on understanding the practical application of the DOT and NRC regulations to all types of radioactive material and radioactive waste shipments. Materials will be provided to facilitate completing the course, including a comprehensive written exam.

Successful participants receive a certification stating that the training meets the requirements of 49 CFR 172 Subpart H and NRC IE Notice 79-19.

Who Should Attend?

Ideal for very experienced radwaste shippers that only need a quick regulation refresher, to learn about recent regulatory or industry issues, and to get recertified.

The course is offered in conjunction with the EnergySolutions Annual Customer Conference held in Salt Lake City, which includes a Clive tour and presentations by industry experts. Attending both back-to-back provides the ultimate in industry updates.

Course Duration: 16 hours

Retrain Frequency: 3 years
