Adequate protection is presumptively assured by compliance with the NRC’s regulations. The NRC Enforcement Policy (the Policy) contains the basic process used to assess and disposition apparent violations of NRC requirements.

III. Discussion

This document provides the public with an opportunity to review and provide comments on the draft revision to the policy found in ADAMS under Accession No. ML20297A235. Each proposed revision is referenced with a bracketed number, called an item number. Each item number is listed in the “Enforcement Policy Revision Summary” document (ADAMS Accession No. ML20297A243) and includes a brief description of the proposed revision. Comments received during this 60-day comment period will be considered for the final version of the policy.
