

Transport of Lithium Batteries by Air/Highway

Course Description

This course is designed to provide participants with a detailed understanding of multi modal shipping requirements for lithium batteries. This training utilizes a systematic approach that provides a logical flow to the shipping of ion and metal batteries by highway and air. Study Guide scenarios are designed not only to prepare the participant for the course examination, but also to allow the student to make appropriate compliance decisions. This ensures all necessary steps are taken to comply with the DOT Hazardous Materials Regulations, and the IATA Dangerous Goods Regulations. Materials will be provided to facilitate completing the course.

Successful participants receive a certification stating that the training meets the requirements of 49 CFR 172, Subpart H and IATA, Section 1.5.

Who Should Attend?

Employees required to certify that lithium batteries shipments are in compliance with IATA and 49 CFR.

Course Duration: 8 hours

Retrain Frequency: 3 years

Course Topics:

- Identification
- Classification
- Proper Shipping Name Selection
- Packing
- Marking
- Labeling
- Documentation
- Examination 80% or Better

Prerequisites: None

Available Format:

Classroom – \$500

Online – \$350
